Next meeting agenda, Thursday, May 3, 2001 7:00pm:

- ❖ Program will be by member, John Dupus, talking about wild edibles.
 - Many plants besides mushrooms and blackberries can be fantastic table fare.
 - This is a hobby that John enjoys.
 - He may have things for us to try. Some of us are requesting a big mushroom fry. John has indicated no to that, but we can hope.
- ❖ If you've missed a meeting or two lately, try and catch this one.

Minutes of last meeting, March 1, 2001:

- ❖ Treasury Report \$1139.81
- ❖ Members who were present at "A Day With Wildlife" included Rick & Shana Campbell, Brent Krugh, Rick Lanham and Charlie Davidson. They reported a huge SUCCESS! Since the weather was excellent, many kids and parents were lined up to test their skill at the archery range. Even Gov. Holden and his kids got into it. Most of the local TV coverage focused on the outdoor activities so many viewers saw our presence there.
- ❖ A discussion of the Deer Classic and if we should have a booth there was the next topic.
 - We may be back at the Classic. Not so much as to make money raffling something, but a general get out and meet the public and membership drive.
- ❖ As we were on the subject of membership, it was agreed that Kerwin and Allen would be updating the membership roster. We have people who have moved away, folks we have not seen for ages and some who are a bit behind on their dues.
 - Kerwin and I will be contacting people on the roster to update their status.
 - Feel free to send \$12 per year to Allen Bock, if you want to be a member, and as always, "Bring a Friend"
- ❖ By this writing, the Parks & Rec Kids Archery class on April 14th is history. Jim and Josh Wiseman, Charlie Langreder, Kerwin Crawford and myself, Allen Bock, were on hand to teach 9 children the basics of archery. This included a brief history, types of equipment, proper technique and form and first, last, and always, safety.
- ❖ Kerwin reported that he has been in contact with the MDC and they are in the process of hiring a full-time Hunter-Ed specialist. Details to follow since we have members eager to get back into Bow-Ed classes, both teaching and learning.
- ❖ The program at the meeting consisted of "talking' turkey". A general discussion of what works, works better and the best way to avoid ticks. PERMANONE, the active ingredient Permethrin, knocks ticks and chiggers in the dirt. No, I do not own stock in the company. I just have seen the difference between using it and not, too many times.
- ❖ Next meeting, on May 3rd, our program will be member, John Dupus, talking about wild edibles. Many plants besides mushrooms and blackberries can be fantastic table fare. If you've missed a meeting or two lately, try and catch this one.
- ❖ Lastly, a report from the Texas hog hunters that recently went down to hunt with our friend, Jeff Massie. Rain, Rain, Mud and mountain lions, but no hogs nor haves were brought back.
- ❖ Submitted by Allen Bock

Upcoming Dates to Remember
